Excavator Safety on Cape Cod

Hitting a natural gas pipeline has serious consequences. Even a tiny gouge, scrape or dent may cause a leak that could lead to a catastrophic fire or explosion.

Request free safety resources and information at capecod.ngridsafety.com.

National Grid is reaching out to excavators working on Cape Cod with custom educational materials to help keep them safe and to prevent natural gas pipeline accidents.

Safeguard yourself, your business and the public

Whether digging with a backhoe or shovel, it's critical that every worker know the requirements and techniques for working safely around underground utilities – particularly given the Cape's unique soil conditions. Preventing accidental gas pipeline contact is critical for the protection of your crew, business and the public.

Stay safe – order your free safety resources today

To order, simply visit capecod.ngridsafety.com and fill out the online form. We pride ourselves in contributing to the well-being of your company, its employees and the general public. Stay safe!
