Learn the information you need to dig safely around natural gas pipelines. Equip yourself and your crew with the knowledge to mitigate potential risks and prevent costly accidents and downtime. Earn a certificate of completion to demonstrate your commitment to safety.

This self-paced online course was developed with the assistance of local excavators and safety professionals. It is not part of New York's required Excavator Training offered by the state's one call centers.

Use 811 before you dig. It's the law.

Dial 811 or make an online request at your state 811 center's website.

This FREE service will arrange for marking of buried natural gas lines and other utilities so that you can work a safe distance away from them. Wait the required time of your state before you start to dig. Every digging project requires 811 – even small or shallow jobs.

**Know what's below.
811 before you dig.**

Always contact your state 811 center before digging and for the most current requirements.

Register and start your online course today at nagridsafety.com/utility-safety-course.

 **Smell Gas. Act Fast. Be the one to call 911.**
For gas emergency service 24 hours a day, 7 days a week, call:

Massachusetts
911 and 1-800-233-5325

New York
Long Island and the Rockaways:
911 and 1-800-490-0045
Metro New York: 911 and 1-718-643-4050
Upstate New York: 911 and 1-800-892-2345

Anyone can be the one who calls 911 and reports a potentially dangerous natural gas situation.
