#17418 – Building/Permit

Leaving natural gas service connected during demolition and major renovation can cause injuries or even deaths.

For the safety of our community, direct contractors and property owners to confirm that natural gas service has been disconnected before beginning demolition or major renovation projects.

Smell Gas. Act Fast.

In a gas emergency, call 911 and National Grid 24 hours a day, 7 days a week. Always call 911 if you suspect a gas leak!

Disconnect natural gas service during demolition and major renovation.

Assuring that natural gas service has been disconnected before work can safely begin is the shared responsibility of everyone involved with the project.

National Grid and local building departments in Massachusetts and New York are critical partners in protecting lives, property and our community.

To ensure projects proceed safely, direct contractors and property owners planning demolition or significant renovation, including building elevation or additions, to contact National Grid to properly disconnect natural gas service before they begin work.

Leaving natural gas service connected poses a hazard that could result in fire, explosion, and loss of life and property, or at a later date, could lead to damage and undetected gas leaks that also threaten lives.

Always contact your state 811 center before digging and for the most current requirements.

Know what's below.
811 before you dig.

Critical steps for contractors and property owners

Direct contractors and property owners planning demolition or significant renovation to take these steps:

- **Contact National Grid well in advance of beginning work** to arrange to have natural gas service disconnected properly and have the meter removed. The owner or contractor should call National Grid's Customer Service Center to speak with a representative about the scope of the project and make arrangements:
 - Massachusetts: 1-800-233-5325
 - Long Island and the Rockaways: 1-800-930-5003
 - Metro New York: 1-718-643-4050
 - Upstate New York: 1-800-642-4272
- **Be clear about the scope of work.** Do NOT request a simple shut-off of the gas when major work is planned. Shut-off is for transition to a new resident/owner when little or no construction or renovation is involved. It is not safe to leave utilities connected while demolition or major construction is underway.
- **Submit a Gas Service Line Alteration and Verification Request to National Grid to obtain a Service Line Disconnect Letter*** before starting work.
 - Each project is unique and fees may apply. Please contact your Customer Service Center for more information.

*Disconnect Letter provided upon request in Upstate New York.

Contact National Grid for expert guidance.

If property owners or contractors have questions about natural gas service when planning demolition or renovation, urge them to call National Grid's Customer Service Center for guidance.
