

January 2026

To: Elected Officials and Offices of Emergency Management
of areas served by National Grid gas operations

Re: Title 16 NYCRR 255.803 and 259.5
Filing of Names of Responsible Company Officials

Dear Sir/Madam:

At National Grid, we don't just talk about the importance of safety – it's embedded in our culture. We are constantly refining and improving our efforts to keep our customers, communities and employees safe. We want public and emergency officials to be prepared for any incident involving natural gas or natural gas pipelines. That is why we created the enclosed list of responsible National Grid representatives whom you may contact in the event of a gas emergency.

National Grid offers a range of additional pipeline safety resources for individuals and organizations in our communities. This includes hazard awareness training and educational resources for school teachers and their students, firefighters and law enforcement, excavators and public officials.

Our publicly available gas emergency call-in numbers remain: **1-800-892-2345** for Upstate New York, **1-800-490-0045** for Long Island and the Rockaways, and **1-718-643-4050** for the rest of our New York City operating area. The list of contacts on the reverse side of this letter does not supersede any unpublished dedicated lines that may have been established for certain organizations. All such numbers remain in effect. If you need further assistance in this matter, please contact us.

Brian Sano

National Grid New York gas service areas

Upstate New York

National Grid operates gas facilities in the highlighted Townships within the following Counties:

- | | | | |
|------------|----------|-------------|------------|
| Jefferson | Cayuga | Lewis | Madison |
| Fulton | Warren | Schenectady | Washington |
| Oswego | Onondaga | Oneida | Herkimer |
| Montgomery | Saratoga | Albany | Rensselaer |
| Columbia | | | |

Downstate New York

- | | |
|--|--|
| New York City Operations:
Staten Island, Brooklyn and Queens (except the Rockaways and Con Ed territory) | Long Island Operations:
Nassau, Suffolk and the Rockaways (5th Ward) |
|--|--|

We need your help!

Please help us communicate these important natural gas safety messages to the public:

- If a gas meter is located inside a home or business, National Grid will need access to the meter and gas service entry to perform mandated inspections. We are required by federal and state regulations to inspect and maintain our delivery, pressure control and gas metering equipment.
- Please keep the area around gas meters clear and free from debris. Storing boxes or other items near the meter may deny access to the main shutoff valve in the event of an emergency or may interfere with our ability to complete mandated inspections and maintenance.
- We are required to replace gas meters periodically and may need to shut off the gas service to do so. When it is time to restore gas service, our employees will need to gain access to the gas meter and appliances.
- Our employees and contractors always carry identification cards. You may ask to see these cards. Mandated inspections are for your safety and are **FREE** of charge. If you would like additional information on mandated gas work, please visit ngrid.com/pipes to learn more. Or call us at **1-718-643-4050** (New York City), **1-800-930-5003** (Long Island) or **1-800-642-4272** (Upstate New York) if you have any questions.

National Grid's natural gas pipelines transport natural gas safely and efficiently to our customers throughout New York as well as to a liquefied natural gas (LNG) storage facility in Greenpoint, Brooklyn, and by compressed natural gas (CNG) transport trailers to portable CNG stations in six New York locations.

On Long Island:

- Glenwood Landing, located on Shore Road across the street from the Glenwood GT site
- Inwood, located on Nassau Avenue at the former Propane Air Plant site
- Barrett, located at the existing Barrett Power Station in Island Park

- Riverhead, located at 8 Mill Road in Riverhead
- Farmingdale, located at 1620 New Highway in Farmingdale

In Upstate New York:

- Moreau CNG station on Washburn Road in Gansevoort, New York

◀ Tear off this list for reference

Major gas emergency contacts

Not for leak calls*

This list is intended to provide **additional** contact information, **above and beyond** our numbers for public leak calls,* or the dedicated, unpublished phone lines that may have been established for certain organizations. This list is filed with the New York State Department of Public Service and local municipalities pursuant to Title 16 NYCRR Parts 255 and 259.

Courtesy copies are provided to Offices of Emergency Management.

National Grid operates natural gas lines and facilities in Upstate New York and New York City/Long Island, in the areas highlighted on the Upstate and Downstate New York maps included in this mailing.

ATTENTION: If you need additional assistance, we recommend **first** calling the local National Grid Gas Dispatch Center noted below. Dispatch Centers are staffed 24/7. They can provide the fastest response and can direct your call to the most appropriate party at National Grid.

Gas Emergency Dispatch – available 24/7	Upstate New York 1-315-460-2001	New York City 1-718-403-2920	Long Island 1-631-861-2850
